Cyber Security & Digital Fraud

What are the threats

- A program that can copy itself and, like real-life viruses, spread quickly.

Virus

- Gain unauthorised access to data in a system or computer.

Hacking

- Any message sent, by email or IM, that you did not request.

Spam

- Software that encrypts files for the purpose of extortion.

Ransomware

- Any attempt to collect personal information in order to steal.

Phishing

- Software that is installed to monitor your activity.

Spyware

Cybercrime Real Life Examples

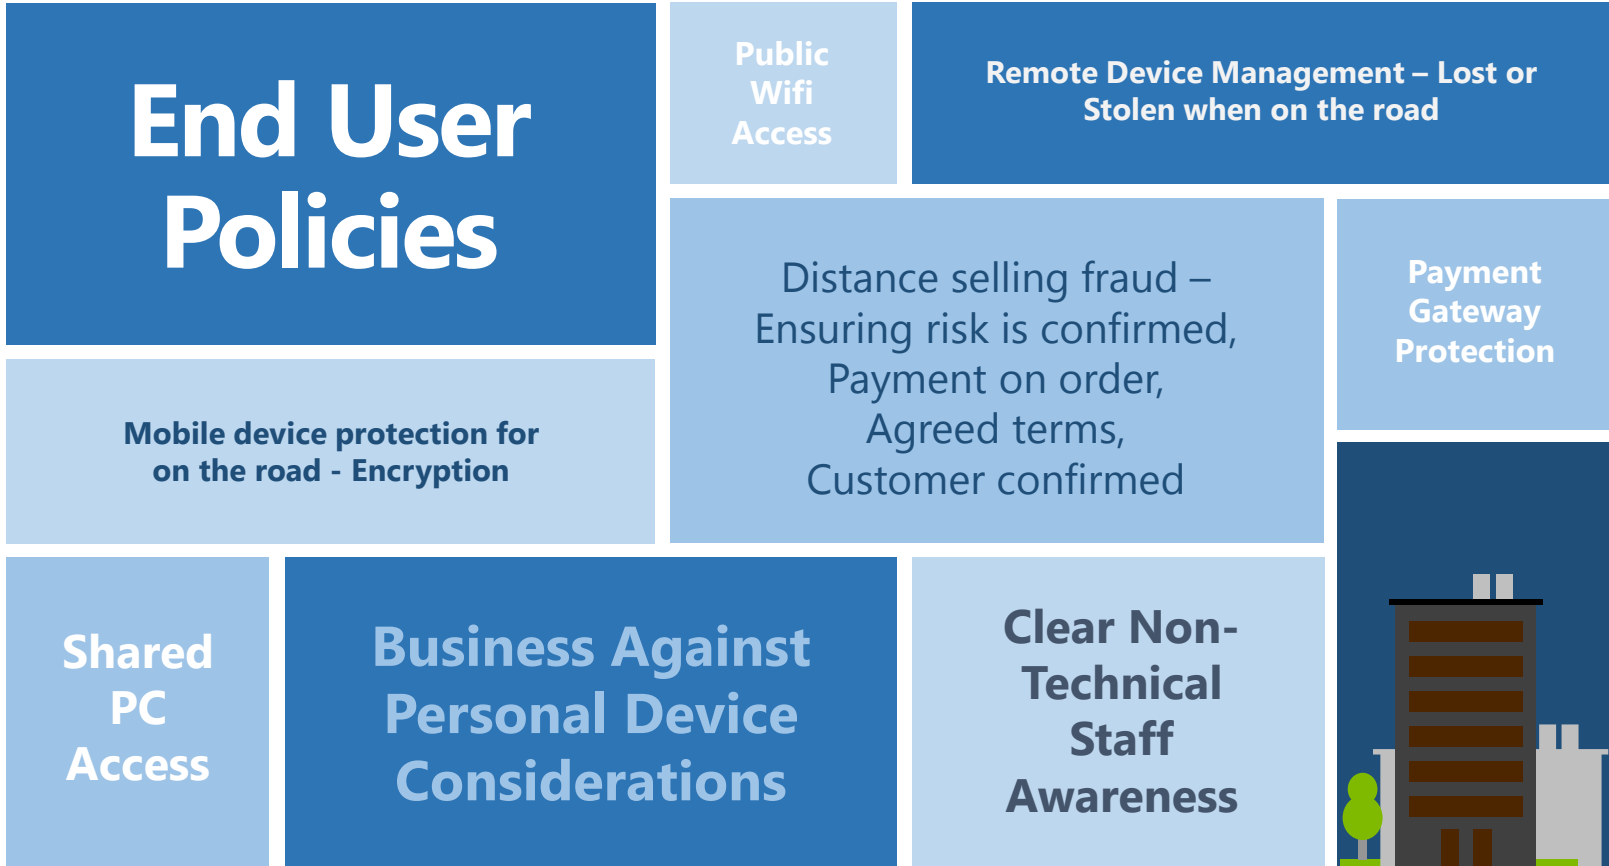

Global

- **157,000 Talk Talk Customer Details Hacked**
- **Olympic Medical Files Hacked**

Local North West

- **£100k stolen from bank account due to poor antivirus solution and end user training**
- **Ransomware – Deletion of all network files and recent backup not able to restore. 8 months lost data.**
- **FD Transferring £9500 to unknown bank account based on email from the “Managing Director”**

International Issues
